YEAR 3 – FIELD TRIP

On 28th April, the Year 3 students went on an educational trip to Lanka Milk Foods (CWE) PLC (Lakspray Factory) in Welisara. They learned about the milk production process, including how milk is processed, packaged and prepared for distribution. The visit also helped them understand the importance of hygiene, quality control and safety in food manufacturing. It was a hands-on experience for them, as it directly linked with their second term topic on Food and Nutrition, allowing students to connect classroom learning with real-life industry practices.

Afterwards, the students enjoyed a snack in a relaxing environment. They spent time with their friends and teachers, making the day both fun and memorable.

YEAR 4 – FIELD TRIP

On 7th May 2026, the Year 4 students of the Junior School at Colombo International School went on an exciting educational field trip to the CBL Group Munchee manufacturing factory. The students observed the biscuit making process firsthand and learned about the different stages involved in food production. It was an informative experience that gave the children valuable insight into how one of Sri Lanka's favourite snacks is made.

After the factory visit, the students relaxed and enjoyed a delicious snack together. The trip left the students with many happy moments and new learning experiences.

YEAR 5 – FIELD TRIP

The Year 5 students recently went on a wonderful educational trip to the turtle hatchery, where they learned many interesting facts about sea turtles and how they are protected. The children were thrilled to see the turtles up close and explore the hatchery with their friends and teachers.

After exploring the hatchery, the students enjoyed some delicious snacks together while chatting happily about their favourite parts of the trip. The day was filled with fun, discovery, laughter and special moments shared with friends and teachers.

YEAR 6 – FIELD TRIP

To begin the final school term, Grade 6 students visited Diyasaru Park in Thalawathugoda for an exciting Wetlands field trip. They learned about the importance of wetlands and the many animals and plants that live there through an engaging introduction by the Wildlife and Nature Protection Society coordinators. Students explored the park, recorded field notes, and spotted a variety of wildlife including birds, butterflies, dragonflies, and reptiles. At the end of the visit, each student received a brochure and certificate before enjoying lunch and refreshments. The trip gave students a valuable chance to experience nature first-hand and understand the importance of protecting wetland ecosystems.
