CIS JUNIOR SCHOOL INDEPENDENCE DAY

CIS Junior School celebrates 74 years of independence in Sri Lanka

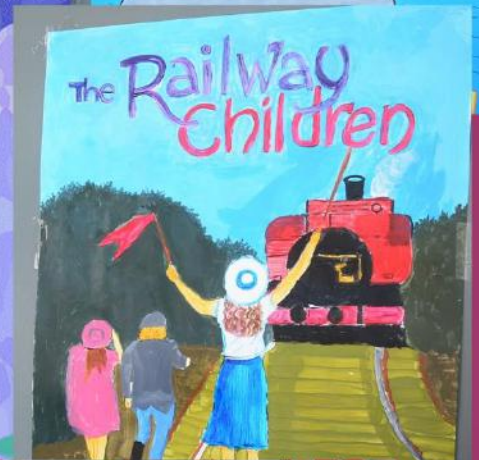

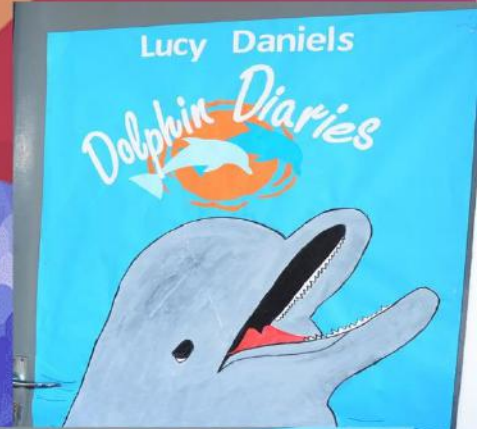

Junior School Library Week

The Junior School of CIS, Colombo celebrated Library Week from the 18th to 21st January 2022.

It was truly amazing to see the enthusiasm and interest shown by all students taking part in Library Week competitions, coming to school dressed as their favourite characters from books & participating in class activities.

We congratulate all participants, and the winners of the competitions that were held: for story writing, book cover designing and a Library Quiz.

A big thank you to all our teachers for their contribution in organizing class events and activities, as well as reading stories to students dressed as characters from books. Library week 2022 was a great success!

Mrs. Macklita Fernando and Miss Diline Gajamugan

We have been very busy during the past month. Students have been learning many new concepts and reviewing old ones as well. We've worked on place value, addition to 100, subtraction to 100, weight, time, and division

so far. After each concept is revised and introduced to the class, the kids are assessed on their understanding using the Maths Assessment book. In addition, a revision test has been conducted recently to revise what has been taught in class.

In Year 3, we all believe that with daily practice we can achieve greater results. So, we are all working towards success, and never forget to do Mental Maths on Tuesdays.

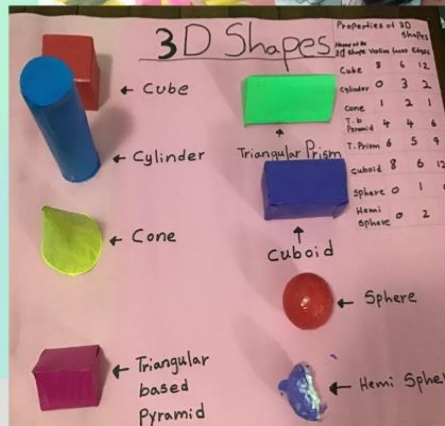

Fantastic Year 4 - 3D Shapes Project

"We enjoyed this project ! It was so interesting to make 3D shapes using nets of shapes "- Rafi & Gabi

"Numerous 3D objects can be found all around us"- Menukie & Shrithyah

"Our Class had lots of fun learning 3D Shapes. We know the vocabulary of 3D Shapes such as vertices , faces and edges." - Akain & Dhilen

"We learned a lot about 3D objects in the real world. - Should these be examples? " - Rakhil & Ashen
